Hamed Sattarian

Full-Stack Designer

As a product designer, I have had the opportunity of designing websites and applications for a diverse range of individuals and companies over the past 10 years. In addition, I possess the proficiency to implement the designs I create using frameworks like Bootstrap and HTML and Sass.

About:

I have worked at Orangery for two significant years as a Senior Product Designer, ending in December 2023. Having worked in web and mobile design for more than 10 years, I specialize in creating interesting user interfaces for a variety of platforms, especially e-commerce. I have extensive experience with all aspects of website design, from planning and creation to flawless implementation, and I work with many people and businesses. My ability to communicate has improved as a result of this adventure, enabling me to work well with teams of all sizes.

Experience:

Product Designer

SaaS / B2B / B2C

Orangery | Germany
2021 - now

Some of my responsibilities are user & market research, gathering further product development ideas, enhancing the UX of Orangery services and making users happy.

Co-Founder, UI-UX Designer

B2b

Defaro.io
2021 - 2022

As a UI/UX designer, I do all stages of design from the sketch to Mockup and Wirefire to implement the user interface side code.

Freelancer Designer

Self-employed
2019 - 2021

For two years, I decided to work as a freelancer. Throughout this time, I had the opportunity to design services and products for notable companies like Iran Airlines, as well as create websites for numerous private individuals. This valuable experience allowed me to develop effective communication skills and effectively handle various types of people and challenges.

Senior UI/UX Designer

B2C

Mega BusinessGroup
2018 - 2020

I was responsible for Research & marketing, Product planning, UI/UX design and even the front-end side (HTML&CSS).
Also have some experience in Sketching and wireframing, creating mockups and user stories, UI design and Ux research for each product, Collaboration with the Development department to create products, Implementation front-end side coding, Testing and analysing products.

UI/UX Designer

C2C

2nate
2015 - 2018

I was in charge of designing all website pages and elements. Additionally, following the design process, I was actively involved in implementing those plans alongside the technical team.
